No doubt you have many microsoft products you dont even use. How many PCs bundle MS office products or MS money and yet you never realize it. Or perhaps you use these every day! Either way Microsoft Updates is a useful tool. Like Windows Updates help your Windows OS running stron and secure so to does Microsoft Updates help keep ALL of your Miscrosoft products up to date. No longer do you have to search for an update to fix a feature you wish to use in Access or worry about a worm getting through Outlooks code, now thanks to Micrsoft Updates you can kick back and watch the computer do the work.... as god intended!
